BIOCHAR AND WOOD VINEGAR

Event Details:

Come join us for an event where you'll learn how biochar and our wood vinegar can help you save money, boost production and create long term solutions that make the soil healthier and farming more viable. Wood Vinegar is a naturally derived blend of plant Phenols, acetic acid as well as Micro/macro nutrients plants need to be successful. Our wood vinegar is OMRI certified for Agricultural use and locally made from sustainably harvested hardwood chips from NY. We will have refreshments and samples for you to try on site. Call us or email for more info!
