

WHY THIS SH!T WORKS IN

CORN

- Monocropping, or simple crop rotation causes a cascade of problems, necessitating the use of synthetic fertilizers and pesticides to control pests, like soil fungi, insects, and other agricultural nuisances.
- Fish Sh!t helps corn farmers avoid agricultural nuisances
- Fish Sh!t is the most robust beneficial bacteria available on the market; beneficial bacterial promotes nutrient mineralization and availability, and acts as a biocontrol agent to fight off plant pests, parasites, and diseases.
- Over 4,000 species of microbes - more than any other beneficial bacteria on the market
- Billions of microbes in every dose
- 100% organic, Crafted at our farm - not in a lab

HEALTHIER, MORE ROBUST CROPS = HEALTHIER, MORE ROBUST PROFITS

FOR EVERY DOLLAR SPENT ON FISH SH!T, CORN FARMERS CAN EXPECT OVER AN 8 TO 1 RETURN ON INVESTMENT

# OF ACRES	FISH SH!T USED PER ACRE	AVG. ADDITIONAL BUSHELS PER ACRE	AVG. SALES PRICE PER BUSHEL	TOTAL \$\$ SALES INCREASE	TOTAL COST OF FISH SH!T*	\$ RETURN ON INVESTMENT FOR EVERY \$ SPENT ON FISH SH!T
500	10 FLUID OZ.	10	\$5.00	\$25,000	\$2,983	\$8.38
1000	10 FLUID OZ.	10	\$5.00	\$50,000	\$5,966	\$8.38
3000	10 FLUID OZ.	10	\$5.00	\$150,000	\$17,898	\$8.38
5000	10 FLUID OZ.	10	\$5.00	\$250,000	\$29,830	\$8.38

*BASED ON TOTE PRICING (275 GALLONS PER TOTE)

TESTING OF FISH SH!T IN CORN CROPS HAS SHOWN:

- To be extremely effective applying in-furrow during planting so current practices do not have to be changed and is a single use application saving both time and money
- To build longer and stronger roots, resulting in better nutrient uptake, more efficient water utilization, drought resistance, and more vigorous stalks
- To improve nutrient availability and plant health, helping to prevent diseases and fight off bacterial infections
- To increase yields, resulting in bigger ears, more kernels, and an average of 10 additional bushels of kernels per acre farmed
